Position: Senior / Analog Design Engineer

Location: Hong Kong

Job Responsibilities:

- Perform analog and mixed-signal circuit design and system integration;
- Supervise physical layout and perform design verifications like pre-layout simulation, post-layout simulation, co-simulation;
- Support behavior modeling;
- Participate in design review and engage in design flow / methodology improvement;
- Compile design documentation and integration guide;
- Define the test plan and perform the silicon evaluation.

Job Requirements:

- Bachelor Degree or above in Electronic Engineering or equivalent
- 5 years design experience and knowledge in analog circuits
- Applicant with less experience will be considered as analog design engineer
- Experience in the following areas will be advantageous: -
  * Mixed signal SoC
  * AMS or VerilogA verification
